TSALO.GITHUB.IO

11200 SW 8TH STREET, AHC4 380
MIAMI, FL 33199

PROFILE

Methodologically-oriented cognitive neuroscientist focused in neuroinformatics. Strong technical skills in neuroimaging data processing, analysis, and meta-analysis. Passionate about transparency, reproducibility, and research software development.

EDUCATION

- Ph.D. **Florida International University, Cognitive Neuroscience** **2018 – 2022**
- Dissertation: Developing and Validating Open Source Tools for Advanced Neuroimaging Research
- Advisor: [Dr. Angela Laird](#)
- M.S. **Florida International University, Psychology** **2015 – 2018**
- Thesis: Meta-analytic search term performance and its effect on neuroimaging meta-analytic power
- Advisor: [Dr. Angela Laird](#)
- B.A. **Cornell University, Psychology** **2009 – 2013**
- Concentration in behavioral and evolutionary neuroscience
- Advisor: [Dr. Timothy DeVoogd](#)

EXPERIENCE

- Graduate Assistant, Neuroinformatics and Brain Connectivity Laboratory** **2015 – 2022**
[Dr. Angela Laird, Florida International University](#)
- Co-designed and executed a dense acquisition MRI pilot study.
- Processed and analyzed neuroimaging data for multiple projects.
- Implemented behavioral tasks in PsychoPy for multiple projects.
- Developed, maintained, and/or contributed to several open source software projects.
- Served as a Teaching Assistant for the ABCD-ReproNim Course (<https://www.abcd-repronim.org>).
- Junior Specialist, Translational Cognitive and Affective Neuroscience Laboratory** **2013 – 2015**
[Dr. Cameron Carter, University of California, Davis](#)
- Acquired neuroimaging and behavioral data from healthy controls and patients with psychosis for projects studying the effects of psychosis on cognitive control, emotion regulation, and brain structure.
- Contributed to and maintained a custom codebase for the analysis of neuroimaging and behavioral data.
- Processed and analyzed neuroimaging and behavioral data for several lab projects.
- Administered behavioral tests and cognitive tasks, including the WASI and WRAT, to both control and clinical populations.
- Trained incoming personnel to administer behavioral and cognitive tasks.

Lab Co-Manager/Research Assistant, Laboratory for Lifespan Affective Neuroscience**2011 – 2013**Dr. Barbara Ganzel, [Cornell University](#)

- Contributed to projects investigating functional and structural changes associated with subclinical trauma.
- Trained undergraduate students to preprocess and perform data diagnostics on fMRI data.

Undergraduate Research Assistant, Bird Song Behavior Laboratory**2012 – 2013**Dr. Timothy DeVogd, [Cornell University](#)

- Prepared solutions for, and assisted in, intracranial perfusion, dissection, and staining of bird brains.
- Examined avian song-related neural regions microscopically.

SOFTWARE AND PROJECT DEVELOPMENT

NiMARE[NIMARE.READTHEDOCS.IO](#)*Lead Developer*

NiMARE (Neuroimaging Meta-Analysis Research Environment) is a Python library for performing meta-analyses, and derivative analyses using meta-analytic data, for neuroimaging research. This tool supports a range of coordinate- and image-based meta-analysis algorithms. NiMARE was conceived at the Code Rodeo sprint in 2018, and since then I have been the lead developer. NiMARE is part of a growing ecosystem of primarily Python-based tools for meta-analysis, including NeuroStore, Neurosynth 2.0, NeuroQuery, and PyMARE.

The Brain Imaging Data Standard[BIDS-SPECIFICATION.READTHEDOCS.IO](#)*Maintainer Team Member*

The Brain Imaging Data Standard (BIDS) is a specification for organizing and annotating neuroimaging data. As a member of the maintainers team, I have been responsible for ensuring specification consistency and helping contributors (especially large-scale BIDS extension proposals) add new elements to the specification. In addition to my regular maintainer work, I have also spearheaded the creation of the BIDS schema, which translates portions of the text-based specification into machine-readable YAML files. As of now, this schema directly renders the majority of tables within the specification, and we are in the process of using it in tools built around BIDS, including the BIDS validator, PyBIDS, and bids-matlab.

Tedana[TEDANA.READTHEDOCS.IO](#)*Maintainer Team Member*

Tedana (TE-Dependent ANALysis) is a Python library for denoising multi-echo fMRI data. This library succeeds the meica.py tool, with several new features and a new emphasis on best programming practices. I have been a member of the Tedana maintainers team since 2018. In addition to developing Tedana directly, the maintainers team has also created several associated tools, including mapca, ddmra, gdec, aroma, and RICA.

Nilearn[NILEARN.GITHUB.IO](#)*Maintainer Team Member*

Nilearn is a popular Python library for neuroimaging data analysis, decoding, and visualization. I joined the Nilearn maintainers team in 2021, and have primarily focused my contributions on improving documentation and general linear model support, including adding cluster-level and TFCE-based correction.

PyMARE[PYMARE.READTHEDOCS.IO](#)*Lead Maintainer*

PyMARE is a Python library for effect-size meta-analysis. PyMARE was developed as a sister library to NiMARE, with a focus on general-purpose meta-analyses. The meta-analytic estimators implemented in PyMARE are then used within NiMARE for image-based meta-analyses. Since PyMARE's primary developer left academia in 2021, I have filled in as its maintainer.

Other open source software*Contributor*

I am a regular contributor to several other open source projects, including fMRIPrep, PyBIDS, HeuDiConv, and Neurosynth.

HONORS AND AWARDS

Brain Initiative Principal Investigators Meeting Trainee Travel Award	2019
Organization for Human Brain Mapping Hackathon Travel Award	2017
Organization for Human Brain Mapping Merit Abstract Travel Award	2017

HACKATHONS AND TRAINING

NiMARE/Neurosynth 2.0 Coding Sprint	2022
BIDS Schema Coding Sprint	2022
OHBM Hackathon	2021
BrainHack Donostia	2020
OHBM Hackathon	2020
NIH Code Convergence	2019
NIH Tedana Hackathon	2019
OHBM Hackathon	2019
Coastal Coding	2019
FIU Brainconn Hackathon	2018
BrainHack Montreal	2018
Code Rodeo	2018
OHBM Hackathon	2017
Neurohackweek	2016

Understanding the neural substrates of physics problem solving: Brain mechanisms and behavior correlates. Presented at the 23rd annual meeting of the Organization for Human Brain Mapping (Vancouver, British Columbia). More information [here](#).

17. Poudel, R, Riedel, MC, Hill LD, Flannery, JF, **Saló T**, Laird A.R, Sutherland M.T. (2017). Behavioral decoding of functionally related brain areas consistently linked to drug cue reactivity. Presented at Florida International University's 2017 Graduate Student Scholarly Forum (Miami, Florida). More information [here](#).
18. Riedel, MC, Poudel, R, **Saló T**, Eickhoff SB, Fox, PT, Laird, AR, & Sutherland, MT. (2016). Co-activation based parcellation of the human insula. Presented at the 22nd annual meeting of the Organization for Human Brain Mapping (Geneva, Switzerland). More information [here](#).
19. Lesh, TA, Maddock, RJ, **Saló T**, Tanase, C, Ragland, JD, Niendam, TA, Solomon, M, & Carter, CS. (2015). Diffusion Measures of Free Water and 1H-MRS Measures of Glutathione in First Episode Patients with Schizophrenia – A Multi-Modal Investigation of an Inflammatory Model for Psychosis. Presented at the 15th biennial meeting of the International Congress on Schizophrenia Research (Colorado Springs, CO) and at the annual meeting of the American College of Neuropsychopharmacology (Phoenix, AZ).
20. Phillips, RC, **Saló T**, & Carter, CS. (2014). Default mode network activity precedes attention lapse in healthy subjects. Presented at the 44th annual meeting of the Society for Neuroscience (Washington D.C.) and at the second annual Northern California Consciousness meeting (Davis, CA).

ADDITIONAL SKILLS

- Python, MATLAB, and bash programming.
- Open source software development.
- Community development and support.
- Behavioral task programming with PsychoPy and E-Prime.
- FMRI processing, analysis, and meta-analysis, using a range of tools, including Nilearn, Nipype, fMRIPrep, AFNI, SPM, and NiMARE.
- Neuroimaging study design.

LAST COMPILED: 2022/05/23
